What's New In?

Workflow Improvements: Advanced workflows have been further improved. In addition to workflow improvements, productivity features have been added to the software. (video: 1:01 min.) **New features for working with 3D models:** The 3D Navigator helps you navigate through 3D models like a topographical map. (video: 1:16 min.) **Multiple Interact:** Multiple objects can be triggered simultaneously, instead of having to interact with one after the other. (video: 1:01 min.) **New 2D interactions:** Select a range of rectangles or objects with the Select By Hand tool, then use the Select by Trapezium tool to select a path through them, without any objects being removed. (video: 1:06 min.) **Coordination Improvements:** Coordination has been improved, which allows better communication and collaboration between users. (video: 1:07 min.) **Better coordination of files and layers:** You can now see which objects and layers are linked to which other files. Linked files are shown in yellow, and are not copied when copying files. (video: 1:03 min.) **New Print Dialog:** You can now print to a PDF. (video: 1:15 min.) **New Watertight options:** When creating or editing a drawing with the Watertight option set to On, you can now adjust the Visibility of 2D and 3D views, and select which parts of a drawing you want to see and which parts you don't. (video: 1:05 min.) **Editor Improvements:** You can now use the side pane to quickly add and navigate to features. (video: 1:05 min.) **Linear and Arc Gantt view improvements:** You can now more easily add and move linear and arc Gantt views in the Projects pane. (video: 1:10 min.) **Improved re-ordering commands:** You can now re-order and copy elements on the Main Menu, and you can now use the arrow keys to re-order objects within a particular sequence. (video: 1:17 min.) **Filters Improvements:** You can now filter your drawings by Revit, SketchUp and Paraview models. You can also filter by drawing region and drawing view, and

CPU: Pentium 4 or equivalent, 2.4 GHz Memory: 4 GB RAM Graphics: The AMD version works with both ATI and nVidia. The Intel version works with only Intel Hard drive: at least 25 GB for installation, and a separate 100 GB hard drive for playing DirectX: 9.0 or higher Sound Card: (Virtually any card will do) If you have one of the following computers you can run in the Half-Life 2 ED MOD with less than full requirements.
